Copy of letter No. 41-6-51—Public, dated 28th November 1951, from the Under Secretary to the Government of India, Ministry of Home Affairs, New Delhi, to the State Governments.

Subject.—National Flag of India—Source of Manufacture and supply of.

I am directed to invite a reference to this Ministry's circular letter No 87-47—Public (b), dated the 29th July 1947, in which it was *inter alia* stated that the Government of India propose, for the future, to arrange to keep in stock National Flags of different sizes at a Central Store on which indents could be made.

2. The National Flag has now been standardised in five sizes, *viz.*, 21′×14′, 12′×8′, 6′×4′ 3′×2′, and 9″×6″ ; the smallest being intended for use on motor cars. It has been decided that the manufacture and supply of National Flags of different materials, *e.g.* Khadi, Silk, etc., will be arranged by the Superintendent, Ordnance Clothing Factory, Shahajanpur. As the Khadi and Silk materials used in the manufacture of flags are difficult to secure and are not normally stocked in the clothing factory, the State Governments are requested to place advance orders up to one year on the Director-General, Ordnance Factories, 6, Esplanade East, Calcutta, in respect of their firm requirements. Standard Flags of Woollen bunting of the various sizes mentioned above are, however, at present stocked by the Ordnance Depots and may be obtained therefrom.

Press Note.

Working of Co-operative Societies in the State for the past four years (from 1*st July* 1947 *to* 30*th June* 1951).

Government have, during the past four years, devoted special attention to the planning of the movement on wise lines. To secure competent opinion on further development, a Seminar on Co-operation was held in May 1950. The delegates of the Seminar have arrived at unanimous decisions as to the directive principles that should be observed for the development of the movement. The report of the Seminar has given very valuable lead in the matter of developing the co-operative movement.

The period under review has been remarkable for great expansion of the movement in all its features, in membership, in share subscriptions, in working capital and in reserves. This can be noticed in the statement given below :—

	Particulars	As on 30th June 1947	As on 30th June 1951
1.	Number of Co-operative Societies	2,545	5,190
2.	Number of members ...	234,711	501,232
3.	Paid up share capital ...	Rs. 79,90,682	Rs. 1,98,74,272
4.	Deposits held ...	,, 1,78 20.606	,, 2,14,98,143
5.	Reserve Fund ...	,, 46,14,845	,, 56,53,138
6.	Total working capital ...	,, 4,04,21,819	,, 6,90,90,904
7.	Net profits ...	,, 7,77,018	,, 18,54,857
8.	Total turnover ...	,, 28,48,36,320	Exceeds Rs. 45 crores.

Multi-purpose Co-operative Societies.—Government after a thorough study of the situation, have taken steps to redress geographical and functional unbalance in the co-operative economy by organizing a scheme of Multi-purpose Co-operative Societies all over the State. The idea is

that for every group of 20 to 25 villages, there should be at least one Co-operative, and that Co-operative should deal in all commodities and engage in all activities necessary for the welfare of the raiyat. As a result of this drive, 828 Multi-purpose Co-operative Societies have been organized in the State. Within the brief period of their existence they have achieved very striking development as shown below :—

Membership	...	...	183,229
Share capital	...	... Rs.	27,76,758
Deposits	...	... ,,	2,84,618
Total working capital	...	... ,,	32,12,769
Sales	...	... ,,	1,70,57,058
Total turnover	...	... ,,	3,41,14,116
Gross profits	...	... ,,	5,40,675

Apart from this quantitative development, a very encouraging feature has been that many of these Multi-purpose Co-operative Societies are now taking up other activities truly multi-purpose in nature. Some have taken up Cottage Industries, some rural credit and so on. Further reorientation of this movement in order to diversify the work of the Societies and to make them more comprehensive is under the course of examination of the Department and of Government. It can be truly said that the organization of this new work of Multi-purpose Co-operative Societies and their phenomenal expansion is the most striking feature for the period under review.

Industrial Co-operatives.—Special attention has been devoted to the expansion of Industrial Co-operatives. In accordance with the recommendations of the Seminar, a federal structure for Societies engaged in cottage industries has been devised and several industries have been thoroughly organised on this basis. Most important among them is the Cotton Handloom Weaving Industry. On a thorough investigation made into the working of a similar organization in Madras, the Provincial Cotton Handloom Weavers' Co-operative Society has been inaugurated, and this institution has been vested with the entire rights of distribution of yarn to handloom weavers on co-operative lines. In addition, it is expected to take up marketing of finished goods, distribution of improved equipment, etc. The Society was inaugurated on 14th August 1950 and its progress up to date is shown below :—

Membership	...	...	180
Share capital	...	... Rs.	18,598
Financial assistance from Government	...	,,	3,50,000
Total working capital	...	... ,,	3,69 048
No. of bales of yarn distributed so far	...		1,402 bales

For a similar purpose a Provincial Silk Handloom Weavers' Co-operative Society has also been organized. It has also shown very encouraging development as shown by the figures given below :—

Membership	...	...	1,219
Paid up share capital	...	... Rs.	1,06,910
Deposits	...	... ,,	20,000
Sales effected	...	... ,,	53,59,186

This Society deals with the supply and marketing of silk-yarn. A Provincial Silk Power-loom Manufacturers' Co-operative Society which has been started is also gathering strength.

In accordance with the policy of the Government of India, steps have been taken to encourage Tees Industry in the State. A Provincial Tees Co-operative Society for this purpose has been organized and a special officer of the status of an Assistant Registrar of Co-operative Societies was appointed to investigate the conditions of the industry and to suggest measures for its improvement. His report is just now in the hands of the Department and it is hoped to organize the industry on co-operative lines soon.

House Building Co-operative Societies.—One of the great problems to be tackled in the State has been the dearth of houses, specially in the urban areas. Government have been alive to this problem and they have of late advanced a sum of Rs. 7 lakhs to House Building Co-operative Societies at rates of interest varying from 3½ per cent to 5 per cent to the following important House Building Societies in the State.

1.	Shimoga House Building Co-operative Society, Ltd., Shimoga	Rs. 1 lakh at 3½ per cent
2.	Do do ...	Rs. 1 lakh at 5 per cent
3.	Mysore City Co-operative Housing Society, Ltd., Mysore.	Rs. 2 lakhs at 5 per cent
4.	Bangalore City Co-operative Housing Society, Ltd., Bangalore.	Do do
5.	Mandya Town House Building Co-operative Society, Ltd., Mandya.	Rs. 1 lakh at 5 per cent

Government have recognised the important role the Co-operatives can play in the solution of the Housing problem and in accordance with the recommendations of the Seminar, they have encouraged the formation of the Provincial House Building Corporation, Ltd., Bangalore, which was inaugurated on 28th August 1950. This Society has already secured shares to the extent of Rs. 56,250, and what is more important, facilities for cash credit through the Apex Bank with an initial sum of Rs. 5,00,000, with promise of other facilities have been secured. It is hoped that the programme of building 425 houses per year will be accomplished with the help given by the Apex Bank and by Government.

Land Mortgage Co-operative Scheme.—Government have devoted very great attention to the problem of relieving rural debt and have given the fullest encouragement to the Mysore Provincial Central Land Mortgage Bank in its operations.

For the redemption of the rural debts, the Land Mortgage Bank has so far advanced Rs. 77·7 lakhs and is trying its utmost to further relieve the burden of the indebted agriculturist. Government have recently been pleased to permit the Mysore Central Co-operative Land Mortgage Bank for the flotation of the XII series of debentures of the value of Rs. 30 lakhs carrying interest at 4 per cent per annum, the proposals therefor having already been approved by the Reserve Bank of India.

Government have also sanctioned a permanent cash-credit facility of Rs. 10 lakhs and have guaranteed a further cash-credit accommodation of Rs. 10 lakhs from the Bank of Mysore on the security of the Title Deeds.

Government have been evincing the greatest anxiety to meet the short-term credit needs of the raiyat population.

The role of the Apex Bank as the Central Financing Institution.—In accordance with the recommendations of the Seminar and after consulting public opinion, Government have issued fresh rules re-organizing the directorate of the Apex Bank to make it more representative of expert as well as non-official opinion and the question of giving it accommodation for short-term credit and of guaranteeing its debentures and deposits is under its consideration.

Co-operative Farming.—One very important development during the past two years has been the starting of a number of Co-operative Farms all over the State. With a view to bring Government cultivable waste lands under cultivation as a part of 'Grow More Food campaign, Government have sanctioned a scheme for the introduction of Co-operative Farming originally at a cost of Rs. one lakh which was later enhanced to Rs. 2,20,000 provided under the grants-in-aid to Co-operative Farms under the Food Bonus Scheme of 1950-51 as approved by the Government of India. The names of Co-operative Farms which are directly financed by Government and others are given below :

The three Co-operative Farms in Chitaldrug and one in Bangalore District are run on collective Farming lines, one in Mysore and another in

Bangalore are worked on joint farming basis while the others are either better farming or tenant Farming Societies.

An extent of 6,570 acres of Government waste lands consisting of either Amrit Mahal Kaval, disafforested areas or date groves is proposed to be reclaimed and brought under cultivation during the next four years. An area of 1,267 acres has already been brought under plough during the year 1950-51 and the remaining portion will be taken up during the subsequent years. The total yield *re*: food crops alone during the year 1950-51 is estimated at 1,720 pallas besides 1,300 maunds of cotton and other crops.

As already indicated, Government of India have sanctioned a sum of Rs. 2,20,000 for utilization by Co-operative Farms towards the farming operations and the State Government have extended several concessions like release of large tracts of Government land for cultivation, waiving the lease amounts in the initial stages, permitting officers of the Revenue, Co-operative and Agricultural Departments to serve as *ex-officio* Directors to guide the operations of the Societies and the like. The Co-operative Farms have therefore been assisted in all possible ways both by the Central and State Governments.

Co-operative Education and Propaganda.—There has been a great development of Co-operative propaganda and education during the period. The practice of having District Co-operative Conferences every year has been started and the Mysore Provincial Co-operative Institute, Bangalore has taken action to hold training classes also in Bangalore and some of the District Headquarters.

Marketing Co-operative Societies.—It is necessary in this connection to mention the very striking development of certain marketing Co-operative Societies. Chief among them is the Malnad Areca Marketing Co-operative Society. It has achieved the place of one of the foremost marketing co-operatives in India. The following statement shows its progress during this period :—

Other types of Societies are also making progress. These include among others Milk Supply Societies, Women's Societies, the Mysore Co-operative Printing Works, Ltd., Bangalore, and other types of special Co-operatives. Government have given liberal financial assistance to the Women's Societies and Milk Supply Societies in particular.

Press Note.

With reference to the letter published in the *Deccan Herald* of 21st January 1952, under the heading "BLACK OUT", it has been ascertained that on the night of the 17th January 1952 a heavy gale caused the bungalow primaries to come into contact with the street lighting conductor in the Basavangudi area resulting in the blowing out of 150 street light bulbs. Action was taken to replace 100 bulbs on the 18th January 1952 and the remaining 50 bulbs were renewed on the 19th January 1952. It is thus seen that the repair was effected in the minimum possible time. It is not true that the area was without lights for one week.

Health of Livestock in Mysore State during December 1951.

In their order of severity, outbreaks of Rinderpest, Blackquarter, Sheep-pox, Anthrax, Hæmorrhagic-septicæmia, Foot and Mouth, Ranikhet, Contagious-goat pleuro-pneumonia and Rabies were encountered in the State during December 1951. Altogether 118 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 253 villages during the previous month. The number of outbreaks was highest in Kolar, Tumkur and Bangalore Districts, while Mandya, Hassan and Chikmagalur Districts were least affected. These diseases accounted for 690 attacks, of which 409 succumbed. The departmental staff conducted 20,590 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth diseases. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth diseases.

Six outbreaks of Rinderpest were registered in Thirthahalli Taluk, accounting for 54 attacks among cattle, of which 14 succumbed. Prompt measures of control were undertaken by the Department to check its spread and 1,918 cattle in the infected villages and 3,092 cattle in 44 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 107 villages, accounting for 20 deaths, as against 103 villages, accounting for 14 deaths during the previous month. The special staff attached to the parasitic disease control units of the Department dosed 10,231 animals, as against 7,667 animals during the previous month.

The rest of the livestock remained free from diseases during the month. Fodder and water were generally available throughout the State.

Prize for the best model of Village Ghani.

The following announcement made by the Indian Central Oil seeds Committee, New Delhi, regarding the award of a prize of Rs. 5,000 to any person who designs the best model of Village Ghani, is republished for general information:—

"The indigenous village ghanis at present used in villages are inefficient in that they take a long time to crush a unit charge and leave a large percentage of oil in the cake. As there is considerable room for improvement, the Indian Central Oilseeds Committee had offered a prize of Rs. 5,000 to any person or body who designs the best model of village ghani and demonstrates its working to the satisfaction of the Committee or a competent body appointed by it.

2 The response to this offer had been poor and the Committee, therefore, decided at its last meeting held in November 1951 that entries for the competition should be called for afresh and that this should be given wide publicity for the information of those who desired to take part in the competition.

3 The improved ghani should fulfil the following conditions:—

The capacity of the ghani per charge should be over 10 seers; the time taken to crush one charge should be not more than one hour in the case of *til* seed; must be run by a single bullock; the price should not exceed Rs. 200; the cake should not contain more than 10 per cent of oil.

4 A preliminary selection will be made on the basis of the particulars supplied by the competitors regarding their models. The selected models would be required to be demonstrated at a place to be decided by the Committee later.

5 When models are selected for final demonstration, the persons concerned will be informed about the date on which they are expected to demonstrate their models.

6 The prize winner will have to surrender the right on the ghani. The committee may purchase it by paying its cost of manufacture, which in no case, should exceed Rs. 200 and the committee will have the patent right.

7 Those desirous of competing for the prize should send a diagramatic sketch drawn to scale, giving full details of working, out-turn, cost, etc., to the Secretary, Indian Central Oilseeds Committee, Ministry of Food and Agriculture, Room No. 345. Block No. 9, Shahjahan Road, New Delhi-2, so as to reach him not later than the 31st August 1952.

(P. N. No. 285—23-1-1952).

press Note.

Reports have appeared in some newspapers that there was a lathi charge on the crowd assembled at the polling booth near the Executive Engineer's Office in Chitaldrug on 10th January 1952.

On enquiries being made, it is ascertained that there was no such lathi charge. All that had happened was that a crowd which had gathered at the polling station became unruly and caused disturbance to the polling work. The Police had therefore to be summoned to clear the crowd and allow the polling work to go on. The police arrived on the spot and dispersed the crowd. Later on, the crowd collected in the police parade ground and after, consultation with each other, went in and voted peacefully.

WORKING OF THE IRON AND STEEL CONTROL AUTHORITY IN MYSORE DURING THE PAST FOUR YEARS. (1947 TO 1951).

Functioning of the Control Authority.—The entire distribution of steel produced in the country being vested in the Iron and Steel Control Organisation of the Government of India; Mysore State gets a periodical quota of steel and the Iron and Steel Control Authority in Mysore has been allotting to the extent possible the requirements of the consumers.

The Control Orders notified by the Government of Mysore in regard to control over distribution of steel and scrap supplies, were in force till September 1950. The Iron and Steel (Control of Production and Distribution) Order and the Scrap Control Order of the Central Government, were extended to Mysore State during September 1950. The working of the Control system during the period was satisfactory.

Allotment.—Till 1947 the State used to get bulk allotments. From 1947 to 1950, separate quotas were allotted by the Centre under "Agricultural" and "Non-Agricultural" heads. Since 1950, additional quotas are being received in respect of (i) Government-sponsored Housing Schemes; (ii) Grow More Food Schemes; (iii) Government Development Schemes and Steel Processing Industries; and (iv) Cottage and Small-scale Industries.

The present allotment of steel for distribution to the general public and the small-scale manufacturers is 470 tons as against 778 tons during 1947. With the increase in the public building programme in the State and the increase in the number of small-scale manufacturers, it is becoming difficult to satisfy the needs of the public. Therefore, release of steel for the construction of new cinema theatres, restaurants and shops, has been suspended.

In March 1948, the Government of Mysore were pleased to constitute a Committee to consider the best manner of distribution of steel allotted to the State. After examination of the position in detail, the Committee recommended that the Amildars in the State may be authorised to issue permits for 2 cwts. of steel per applicant for purpose of building construction. This recommendation was adopted. The release of steel for the construction of residential building is therefore restricted to 2 tons per applicant at a time.

The requirements of the manufaturers of consumer goods and carts, and of the cottage industries were released to the extent possible, according to the recommendations of the Director of Industries and Commerce.

The work of releasing galvanised corrugated sheets to the general public has been entrusted to the Deputy Commissioner of each District since 1950.

Distribution through Registered Dealers.—Distribution of steel to the general public is being made through the registered dealers in the State. Prior to 1947, there were 87 registered dealers. As the dealings of some of these dealers were found to be suspicious, 14 dealers were removed after necessary inspection. Further, as the supply position of steel is not satisfactory, the names of 34 dealers, whose business was dormant, were removed from the list of registered dealers as per advice from the Iron and Steel Controller, Government of India. There are now 39 registered dealers for steel in the State.

General.—In view of the continual growth of the towns on account of the expansion and starting of industries and public utility works, there is great demand for steel for construction of dwelling houses, etc., and the present allotment of steel for this purpose is out of all proportions to the needs of the public. Since the Central Government are themselves allotting the requirements of the Industries and Government interests direct, the allotment to the general public and small-scale manufacturers has been cut down considerably. The same difficulty is experienced with regard to the galvanised sheets. The Government of India is being continuously urged for grant of increased allotments to our State.

However, with the meagre allotment to the State, distribution of steel is being made as equitably as possible, depending upon the *bona fide* needs of the applicants.

OFFICE OF THE COMPILER, *MYSORE GAZETTE*

NOTICE.

1. The *Mysore Gazette* is published at Bangalore every Thursday. Matter for publication in the Gazette is often sent late to the Press. (ii) Indents for less than 100 spare copies should not be sent to the Press, subject to the exceptions contained in G. O. Press Note.

Term of Village Panchayets.

According to Section 12 of the Mysore Village Panchayet Act, 1926, the normal term of office of the Members of Panchayets is three years which may, by order of the Deputy Commissioner, be extended to a term not exceeding four years in the aggregate. In January 1951, a Bill was introduced in the State Legislative Assembly for the reorganisation of District Boards and Village Panchayets and pending the enactment of this measure, it was decided to continue the Village Panchayets under the existing Act. This measure was passed by the Legislative Assembly last November.

It was brought to notice of Government that the maximum term of Office of the Members of the Village Panchayets in some Districts had expired or was due to expire and that the Panchayets could not be reconstituted well in time, in view of the new Legislation expected to be promulgated. It became, therefore, necessary to validate the continuance of the Panchayets whose term of office expired under the Act of 1926 and to provide for the continuance of all the Panchayets till the new Act was brought into force. Since the Legislative Assembly was not in session, an ordinance was promulgated for validating the continuance of the Panchayets whose term had expired and fixing the term of all Village Panchayets retrospectively at five years from the date of their constitution.

Licensing of Hullers.

In pursuance of the suggestions of the Government of India, orders were issued in Government letter No. S. D. 5973—C. 99-49-6, dated 19th February 1950, directing that no more hullers should be licensed. A large number of persons are still applying for Huller Licenses. As the milling losses in Huller Type of Mills are much higher and it is criminal to waste foodgrains, particularly rice, the recommendations of the Honorary Adviser to the Government of India were accepted by this Government. Accordingly, the Deputy Commissioners have been instructed to strictly adhere to this policy and reject all applications for grant of fresh licences for Hullers. The public are requested to co-operate with the policy of Government by desisting from applying for grant of Huller Licenses.

2. However, as it would cause undue hardship to certain applicants who had already purchased and installed Hullers before the issue of the Order, dated 19th December 1950, it is found desirable to license all Hullers which were actually installed before 1st January 1951, subject to the conditions prescribed by the Government of India. Hence, instructions have been issued to grant licences to such applicants, who had installed the machinery before 1st January 1951, after the production of a Certificate given by the Chief Inspectors of Factories in Mysore, to the effect that the following improvements and adjustments have been actually carried out:—

(i) the revolutions on the Hullers should not exceed 450 revolutions per minute;
(ii) the huller screen on the outlet side of the Huller should be closed by a blind mild sheet or should entirely be replaced by a mild steel sheet of the same thickness as the screen;
(iii) the blade of the Huller should be left as far back as possible to give the standard type of unpolished rice;
(iv) paddy separators should be installed to avoid the loss from high polishing and brokens.

3. The licences of the existing Licensed Hullers will be renewed after the expiry of current period of licence, only after the prescribed renewal fee of Rs. 10 (Rupees ten) is remitted and a Certificate as in para 2 above is produced to the effect that the improvements and adjustments enumerated above at para 2 (i) to (iv) have been carried out.

4. Persons who intend going in for a Huller are advised to go in for the *Japanese Type* of Rice Mills (ZUICKOO) (Sheller Type, which costs about Rs. 3,975 and is stated to run even on 5 H. P. Motor or Oil Engine and which was demonstrated at the last Dasara Exhibition.

Health of Livestock in Mysore State during January 1952.

In their order of severity, outbreaks of Rinderpest, Foot and Mouth, Blackquarter, Sheep-pox, Anthrax, Ranikhet, Hæmorrhagic septicæmia and Rabies were encountered in the State during January 1952. Altogether 219 villages were reported to have been affected by one or the other of the several contagious and infectious diseases as against 118 villages during the previous month. The number of outbreaks was highest in Tumkur, Mysore and Bangalore Districts, while Shimoga, Hassan and Chikmagalur Districts were least affected. These diseases accounted for 1,836 attacks of which 684 succumbed. The departmental staff conducted 39,130 preventive inoculations and vaccinations against all the above diseases except Foot and Mouth disease. In the absence of a reliable method of vaccinatory intervention, other prophylactic measures were adopted against Foot and Mouth disease.

867

Four outbreaks of Rinderpest were registered in Koppa and Hosanagar taluks accounting for 26 attacks among cattle, of which 19 succumbed. Prompt measures of control were undertaken by the department to check its spread and 1,499 cattle in the infected villages and 4,340 cattle in 71 neighbouring villages were protected against this disease. The disease appears to be well under control at the end of the month under report.

Diseases caused by internal parasites were reported from 106 villages accounting for 34 deaths as against 107 villages accounting for 20 deaths during the previous month. The special staff attached to the parasitic disease control units of the department dosed 8,460 animals as against 10,231 animals during the previous month.

The rest of the livestock remained free from diseases during the month. Fodder and water were generally available throughout the State.

Sole Agency for the Government Silk Weaving Factory, Mysore.

The attention of Government had been drawn to a Press report of a resolution said to have been passed by the Managing Committee of the Mysore Silk Cloth Merchants' Association, Bangalore City, against the alleged appointment of a sole agent for the Government Silk Weaving Factory, Mysore, without calling for tenders. It is absolutely incorrect to say that tenders were not called for. Tenders were called for as per Gazette Notification, dated 7th December and 14th December 1950, besides notification published in the local dailies. Tenders were received and fully considered by the Board of Management of Industrial Concerns and the present agency was awarded by Government on the recommendation of the Board as being most advantageous. It is not correct to say that the present Agent, Janab Mohamed Abba Sait is "not in the line", as he was a reputed wholesale cloth merchant in Mysore of over thirty years standing. The resolution obviously is based on a total misapprehension of facts.

Press Note.

Return of Election Expenses.

The return of election expenses has to be lodged with the Returning Officer in respect of each person, who has been nominated as a candidate within 45 days from the date of publication in the official Gazette of the Returning Officers' Declaration, containing the names of the elected candidates. The form in which this return should be filed is printed and kept for sale for the use of candidates at the Government Central Book Depot. Doubts have been raised in some quarters whether persons whose nominations have been rejected or who withdrew their nominations before the time fixed for the purpose have also to file the return of election expenses. The rules are clear and the return of election expenses should be filed even in respect of those persons whose nominations have been rejected or who withdrew their nominations before the time fixed for the purpose.

The attention of the persons filing this return of election expenses is also in this connection invited to Schedule IV of the Representation of the People (Conduct of Elections and Election Petitions) Rules, 1951, which gives instructions about the manner of filing up the form and to the declarations by the candidate and his election agent to be made on oath or solemn affirmation before a magistrate and filed along with this return (the form of declaration is given in the Schedule) written on papers stamped with non-judicial stamps on the value of Rs. 2 each.

Census Figures and Sample Verification.

Though it has always been recognised that no Census can be a hundred per cent correct, every Census in the past has claimed to be more accurate than its predecessors. This claim has never been put to test, however, or demonstrated in figures, even when there was good reason to believe that extraneous causes had vitiated the Census count. As a departure from this practice (and following the recommendations of the United Nations Organisation) the general population Census of Mysore, taken in March last year, was followed up six months later by an enquiry designed to verify, scientifically, and, on the basis of a random sample of households, the accuracy of the figures gathered at the census. The Census Commissioner for Mysore has reviewed this operation in a report published in December 1951, entitled "Sample Verification of the Census Count." So far as Mysore was concerned such an objective verification was most desirable, because the latest count had registered such a big rise in the State's population during the previous decade that it was suspected that a good part of the increase must have been due to wilful inflation of numbers. Now that the Census figures have been verified, it is possible to dispel all suspicions and to know exactly how close we are, or how distant, from the ideal of a perfect Census.

Under the scheme of verification, nearly 130 Verification Officers, almost all of whom were Magistrates, were deputed to visit a perfectly random sample of households chosen from the total mass of households enumerated at the Census, to see in each household how many persons were enumerated in excess and how many erroneously omitted from the count; and, in addition, to ascertain in how many instances, if any, entire houses had slipped through the Census net due to the failure of the Census Enumerator to cover them. The sample comprised of nearly a thousand households; and three times as many houses were checked for coverage. Skilfully designed safeguards were built into the procedure of verification to ensure that neither the verifiers nor the verified had any opportunity for dishonesty, and only genuine cases of erroneous enumeration were taken into the final reckoning. The results obtained for the sample furnished estimates in respect of the total population.

The single, most important, conclusion drawn from the results is that the nett error in the count is one of under-enumeration and not over-enumeration. In other words, though there is some distortion in Census figures, the distortion has neither the direction nor the degree that it was expected to have. Happily, therefore, census figures have not been marred by any wilful inflation of numbers. However, according to anticipation, mis-enumeration was

found to be greater in cities and towns than in villages. For the State as a whole it is estimated that a little under one lakh of persons (*i.e.*, a little over one per cent of the State's population) have been omitted from the count, through both under-enumeration within households and by the omission of the Enumerator to cover entire households. The contribution to this figure of rural and urban areas is 60,771 and 34,987 persons, respectively.

Now that all doubts as to the accuracy of the Census figures have been dispelled, the staggering rise of the State's population during the last decade becomes harder to explain. That increase would have to be accounted for in terms of demographic factors revealed by Census data. It is possible, for instance, that a substantial part of the increase in population could be attributed to an unusual influx of people into Mysore from the neighbouring States. An increased survival rate resulting from the enormous growth in the activities of the State's Medical and Public Health Departments during the last decade may be another reason. Other causes may come to light as the scrutiny of Census figures progresses further. However a factor which might have greater importance than we imagine is under-enumeration in previous Censuses. There is evidence that, at the 1951 Census, the population was actively interested in getting itself enumerated. This situation was in complete contrast to that in 1941 when the population sat, as it were, on the side lines, watching the Census game. Food rationing, more than any patriotic feeling towards the Census, is perhaps at the bottom of this change in attitude; but whatever the reason the effect of the change has been a significant improvement of population data. The gap between the actual population and the under-estimate of that population customarily furnished by the Census, has been narrowed down. With this knowledge Census data can now be used with increased confidence.

Press Note.

The following Press Note issued by the Election Commission, Government of India, New Delhi, clarifying certain points in respect of the return of Election Expenses to be filed by candidates, is re-published for general information :—

Return of Election Expenses—Points Clarified.

"Numerous enquiries have been made of the Election Commission by candidates from time to time in respect of certain points affecting the return of election expenses to be filed by them in Form 26 of Schedule I of the Representation of the People (Conduct of Elections and Election Petitions) Rules, 1951. The Commission's views on some of the points raised are stated below for the information of the candidates and their agents, who should, however, be finally guided by their own legal advisers.

Scope of the term "Expenses".

The Commission has been asked whether the term "expenses" used in paragraph 2 of Form 26 will include expenses not authorised either by the candidate or by his election agent. The Commission is of the opinion that the term includes all expenses specified in Rule 111 of the Representation of the People (Conduct of Elections and Election Petitions) Rules, 1951, and the maximum fixed under Schedule V of the Rules has reference only to the total of all such expenses.

Expenses for volunteers and other unpaid workers.

In addition to persons who are allowed, under the rules to be employed for payment by a candidate or his election agent in connection with an election, he usually enlists the support of volunteers and other unpaid workers to assist him in his election campaign. While such volunteers and workers may not receive from the candidate or his agent any remuneration for the voluntary assistance they give to a candidate, the candidate may have provided them with refreshments or food or with their out of pocket expenses, *e.g.*, transport charges or free transport. The question has arisen as to the appropriate head of account under which such expenses should be shown. In the Commission's opinion such expenditure does not violate Rule 118 of the above Rules and should be entered in Part 'K' of Form 26.

Purchase of cars or other conveyances.

A candidate may have purchased one or more cars immediately before or during the elections for using the same during his election campaign. He may have disposed of such cars by sale at the end of the elections or may have retained one or more of them for subsequent use. The Commission considers that the requirements of the law would be met if the candidate shows in the appropriate part of Form 26 the actual running expenses of the vehicles in connection with his election work during the period of the elections up to and including the date of declaration of the result of the election. If any vehicle has been sold off, the difference between its cost price and the sale price should also be shown as an election expense. Where the vehicle has not been sold but is retained for personal use, no part of the cost price need be shown as election expense. If a number of vehicles were purchased during or immediately before the election period, however, the presumption of their purchase for personal use may not apply and it may be necessary to include in the election expenses a reasonable part of the cost price of the vehicles.

Use of private cars belonging to a friend by candidate or his agent.

In a case where a candidate or his agent uses a private car belonging to a friend or belonging to his party for election purposes, the actual running expenses of the car during the period of its use for election work should be shown whether the same had to be paid to the friend actually or not.

Joint expenditure by Parliamentary Candidate and Assembly Candidates.

In a Parliamentary Constituency comprising the appropriate number af Assembly Constituencies, the Parliamentary candidate and the Assembly candidates belonging to the same political party or otherwise associated with each other have often incurred certain items of expenditure jointly to advance the interests of all of them in the elections. In such cases, the total expenses for each item should be apportioned amongst the Parliamentary and the Assembly candidates in a reasonable manner. One possible formula is to distribute the amount amongst the candidates proportionately in relation to the maximum permissible expenses fixed for the Parliamentary and the Assembly Constituencies in that particular area. For example, if a Single-member Parliamentary Constituency comprises three Single-member and one Two-member Assembly Constituencies and the maximum expenses permitted under the rules are Rs. 25,000 for the Parliamentary Constituency, Rs. 8,000 for a Single-member Assembly Constituency and Rs. 12,000 for the Two-member Assembly Constituency, and if the Parliamentary candidate and the five Assembly candidates have incurred any expenses jointly, the Parliamentary candidate may show $\frac{25,000}{25,000 + (3\times8,000) + (2\times12,000)}$ *i.e.*, $\frac{25}{73}$ portion of the total joint expenses, while each single member Assembly candidate may show 8/73 and the Double-member Assembly candidate 12/73 of such total."

Precautions against accidents by Electrocution.

The following eleven safety rules are issued for the guidance of the public against danger to life and property from electric power lines.

The public are hereby requested to see that these rules are observed strictly and to transmit them to their uneducated brethren in the rural parts of the State :—

1. DO NOT TOUCH or rest against poles carrying electric power lines.
2. DO NOT USE the poles for tying cattle and sheep. This may result not only in death of the animals but also of men attending to them.

3. DO NOT PICK UP electric wires lying on the ground as they may be alive. In such cases, report immediately at the nearest Electric Supply or Police Station.
4. DO NOT WALK under the lines. When necessary cross them as quickly as possible.
5. DO NOT RUSH to rescue a person or animal in contact with electric wire or pole *with your hands* as this is extremely dangerous to your own life. Stand on dry ground or dry board and use dry wooden stick to pull the body away from the live wire or pole. Do not use any metal article for the purpose.
6. DO NOT RUSH to extinguish fire under power lines without satisfying yourself that no wires are lying about.
7. DO NOT ALLOW crops under the power lines to grow within ten feet of the electric wires.
8. DO NOT CLIMB trees in the proximity of power lines.
9. DO NOT TRY to cut branches of trees overhanging power lines.
10. DO NOT SIT on the tops of bullock carts or on loaded carts crossing electric lines.
11. DO NOT ALLOW YOUR children to throw strings, creepers, etc, across the electric wires or permit them to fly kites in the neighbourhood of electric lines.

Rules for the safe use of Electricity.

In view of the fact that the monsoon months are fast approaching, it is necessary to remind the public again about the rules to be observed for the safe use of electricity. Just as the monsoon finds the weak spots in a building, it also discovers weaknesses in an electrical installation. The risk of electric shock arises from some fault which has occurred, either in the installation or in the appliances in use. The risk arises when any metal case or covering of an electric fitting or appliance comes into contact with conductors owing to the breakdown of the insulation or if the covering of an electric wiring has deteriorated. Dampness increases these risks so that extra precautions should be taken wherever moisture comes into contact with electricity.

The following eight rules, if stricty observed, will ensure safe use of electricity at all times :—

1. *Keep Moisture away from Electricity* :—Do not handle switches or appliances with wet hands. In the bath-room, use insulated switches and enclosed or insulated lighting fittings : do not take portable appliances into the bath-room.

2. *Use Flexible Cords with care* :—Do not allow cords to kink. Circular, instead of twin twisted, cords for portable appliances will last longer and wear better. Never allow joints to be made in cords. Do not disconnect appliances by pulling on the cord ; this loosens the connections and is a frequent source of trouble. Use specially constructed cords for use in damp places and where contact with metal is likely to occur. Do not use a damp cloth for cleaning cords.

3. *Do not use long flexible cords as a Substitute for Permanent and Properly installed Wiring* :—Long lengths of cord if run under carpets or rugs become worn too quickly ; if run through doorways, they may be squeezed and the protective covering damaged. Extra plugs can be installed without upsetting the house and the greater convenience will be worth more than the cost of installation.

4. *Do not leave Heating Appliances connected when not in use* :—Fire may be caused, if connected.

5. *Switch off when Cleaning* :—There is a main switch near the meter which turns electricity off completely throughout the house ; use it when you are cleaning lamps and fittings.

6. *Do not let children Tamper with Electrical Appliances, Cords, or Plugs* :—Any slight damage is likely to develop serious defects in the system.

7. *Do not use faulty Electrical Appliances or Fittings* :—However small the fault may be, it is better and cheaper to have it attended to immediately. Be sure to have electrical repairs and maintenance done by a Licensed Electrical Contractor.

8. *Monsoon Precautions* :—An electric installation which is safe during dry seasons may develop leakage and the danger of shocks as soon as monsoon conditions begin. Have your installation tested by a Licensed Electrical Contractor at least once a year ; at the beginning of the monsoon, to ensure that it is in good condition.

Press Note.

Finance Commission invites Suggestions.

The following Press Note issued by the Finance Commission, Government of India, inviting certain suggestions from the public regarding (i) the distribution of the net proceeds of income-tax between the Union and the States and the allocation of the States' share among the States [*vide* articles 270 and 280(3) (a) of the Constitution;] and (ii) the principles which should govern the grants-in-aid of the revenues of the States out of the Consolidated Fund of India [*vide* Article 280 (3) (b) read with Article 275 of the Constitution], is republished for general information :—

Press Note.

Among the questions on which the Finance Commission will have to make recommendations are :

(i) the distribution of the net proceeds of income-tax between the Union and the States and the allocation of the States' share among the States [*Vide* Articles 270 and 280 (3) (a) of the Constitution ;] and

(ii) the principles which should govern the grants-in-aid of the revenues of the States out of the Consolidated Fund of India [*vide* Articles 280 (3) (b) read with Article 275 of the Constitution].

1606

At present, 50 per cent of the divisible net proceeds of income-tax (other than Corporation Tax) is assigned to the States and distributed among them in the following percentage ratios: Assam—3; Bihar—12·5; Bombay—2, Madhya Pradesh—6; Madras—17·5; Orissa—3; Punjab—5·5; Uttar Pradesh—18; and West Bengal—13·5.

Seven out of the eight Part B States are also now entitled to share in the proceeds of the income-tax along with the nine Part A States.

Various bases have been suggested for allocating income-tax:

(i) the *collection* of income-tax in the various States;
(ii) the amount of income-tax realised in respect of incomes, wherever earned, of individuals *resident* in the different States;
(iii) the collection of income-tax in the various States adjusted with reference to the *origin* of the income;
(iv) the relative *population* of each State;
(v) the relative volume of *industrial labour* in each State;
(vi) the *needs* of the different States according to various criteria; and
(vii) different combinations of the above factors.

Claims are advanced for grants-in-aid on the basis of needs for balancing the budget, for brining up the level of administration and raising the standard of social services in certain States and backward regions, for implementing some of the Directive Principles of the Constitution, for economic development, for bearing special additional burdens or dealing with disabilities consequent upon partition, etc.

Further points which arise with respect to grants-in-aid are whether the grants should be general or specific, conditional or unconditional.

Before making their recommendations, the Finance Commission would welcome the views of all who may have made a study of these questions. The views may be set forth in a written memorandum and sent to the Secretary, Finance Commission, 'Faridkot House', Lytton Road, New Delhi, on or before April 15, 1952.
